ESTAL STOCKS INVENTORY AT SAO MARTEN

(léppi German;

25X1X

This document is a tabulation of metal stocks on hand at SAG (Soviet Corporation) Harton, in Hettstedt, as of 1 January 1952. The top one-third of most of the photostate is more or less illegible.

The tables covers

- hand of various types of steel in billets, ingote, blooms, and sheets; het-rolled strips, and cold-rolled strips; and sundry types.
- B. Henferrous Notels (9 pages): These tables give the amounts, in kilograms, of raw material, screp, and shavings of the various nonferrous metals. Weight totals are given by groups, i.e., raw copper: 307,083.5, copper scraps and chips: 327,718.9; total red brase: 18,182; total brase: 755,942.4; total bronse: 29,645.2; total copper mickel: 72,945; etc.
- C. Hetal Alloys (2 pages): These are aluminum alloys so far as legible. Totals are given in kilogrems, i.e., pure aluminum: 217,957.9; aluminum alloys with more than 2.5 persent copper: 65,953; copper-free aluminum alloys: 20,40kg etc.

25X1A

The fereign language document or a microfilm of it (No. C 5878) is available from CIA Library,
